

# BPES 10-105

A NEW BACK PULLER EXTRACTOR SET,  
FROM NTN-SNR

## 1 KIT : 2 TOOLS

In order to meet your expectations, the BPES 10-105, with its movable support brace, enables detachment and extraction. Thanks to the back puller and the 2 arm puller provided in only one kit, removal of rings or bearings tightly fitted on a shaft and difficult to grip, becomes very easy.

## SAFE

Kit contains 2 sharp bevelled blades which ensure a very good grip on the bearing and avoid deterioration of the shaft's seat while dismantling. With a power of 100kN, BPES 10-105 guarantees reliable and safe dismantling in every instance.

## MULTIPURPOSE

With its unique design and modular tools, the BPES 10-105 offers you a wide range of applications. The movable puller jaws allow for both internal and external extractions, and the 2 extension rods included are perfect for application requiring a longer reach.

## TWO TOOLS IN ONLY ONE KIT

External extraction with movables 2 arms puller  
(possibility also of internal extraction)

Back puller extraction

## TECHNICAL INFORMATION

- 1 extractor
- 1 back puller
- 2 movable jaws
- 2 extension rods
- 2 hex nuts
- 1 spindle tip protector

Back puller
